Timothy Stephens
Curriculum vitae

Personal summary

I am a computational biologist working on understanding the forces that govern the interactions between organisms in ecologically critical environments, such as coral reefs, and the forces that drive major evolutionary transitions, such as the one that gave rise to the first photosynthetic Eukaryotas.

Department of Biochemistry and Microbiology, Rutgers University, USA

TimothyStephens
@timstep1383

Education

2016 — 2019 PhD, Institute for Molecular Bioscience, The University of Queensland

2015 — 2015 Honours, Institute for Molecular Bioscience, The University of Queensland

2012 — 2015 Bachelor of Biotechnology, Institute for Molecular Bioscience, The University of Queensland

Research Experience

2019 — present Post Doctoral Associate, Department of Biochemistry and Microbiology, Rutgers University

Queensland

2015 — 2015	Honours Project, Institute for Molecular Bioscience, The University of Queensland
2014 — 2014	Undergraduate Researcher Project, School of Biological Sciences, The University of Queensland
2013 — 2013	Paid Research Assistant, School of Biological Sciences, The University of Queensland
2012 — 2013	Undergraduate Research Project, Institute for Molecular Bioscience, The University of Queensland

Teaching experience

2020 — 2022 **Guest lecturer**
Rutgers University
Conducted lectures on de novo next-generation sequencing, genome and transcriptome sequencing, and metagenomics in a join undergraduate and postgraduate course titled "Fundamentals of Microbial Genomics". Also assisted in designing and marking student exam questions and students' oral presentations.

2018 **Head Practical Tutor**
University of Queensland
Duties included designing and developing assessment material for the course and organising marking of assignments.

2016 — 2017 **Practical Tutor**
University of Queensland
Duties included assisting students with the completion of set questions and marking of

assignments.

2013 — 2014 **Peer Assisted Study Session (PASS) Tutor**
University of Queensland
Duties included planning and leading multiple weekly tutorial sessions, each comprising 20-30+ students.

2013 **Science Mentor**
University of Queensland
Duties included organizing and running first year science student introduction and social engagement events designed to inform students about study/research opportunities available at The University of Queensland.

2012 — 2014 **CASPiE Tutor**
University of Queensland
Duties included guiding undergraduate chemistry students through an advanced set of research-focused practicals, with the aim of developing

their critical and experimental thinking.

Professional development

2017	UQ Idea Hub, University of Queensland
2017	Research Commercialisation Workshop, University of Queensland

Awards and honours

2021 2019 Dean's Award for Outstanding Higher Degree by Research Theses, University of Queensland

2018 Registration award for Society for Molecular Biology & Evolution (SMBE) 2018, SMBE

2017 Won best pitch prize at the UQ Idea Hub, University of Queensland

2016 Research Training Program (RTP) scholarship, University of Queensland

2016 Top poster prize at the IMB Research Higher Degree Student Symposium, University of Queensland

2012 Dean's Commendation for Academic Excellence (achieved a GPA over 6.6), University of Queensland

2011 Merit Scholarship for academic achievement, University of Queensland

Talks

2022 **Stephens T. G.**, Etten J. V., McDermott T., and Bhattacharya D. Analysis of environmental meta-omics data from the extremophilic red algae Cyanidiophyceae. *Joint Aquatic Sciences Meeting*. 14-20th May, 2022, Grand Rapids, USA.

2022 **Stephens T. G.**, Strand E. L., Putnam H. M., and Bhattacharya D. Differences in ploidy and the prevalence of clonal propagation between *Montipora capitata* and *Pocillopora acuta* from Kane'ohe Bay, Hawai'i. *15th International Coral Reef Symposium*. 3-8th July 2022, Bremen, Germany.

2022 **Stephens T. G.**, Williams A., Shumaker A., and Bhattacharya D. Integration of multi-omics coral data under thermal stress . *4th Institute for Food, Nutrition, and Health*. 4th November 2022, Rutgers University, New Jersey, USA.

2021 **Stephens T. G.**, Calatrava V., Gabr A., Grossman A., and Bhattacharya D. Insights into the evolution of a primary endosymbiosis through analysis of the *Paulinella* genome. *12th International Phycological Congress*. 22-26th March 2021, Chile.

2021 **Stephens T. G.**, Calatrava V., Gabr A., Grossman A., and Bhattacharya D. Insights into the evolution of a primary endosymbiosis through analysis of the *Paulinella* genome. *75th Annual Meeting of the Phycological Society of*

America. 13-22nd July 2021, online.

2019 **Stephens T. G.**, Bhattacharya D., Ragan M. A., and Chan C. X. *Polarella* genomics: understanding the evolutionary transition to algal symbiosis and cold adaptation. *Joint Academic Microbiology Seminars (JAMS)*. 9th April 2019, Brisbane, Australia.

2018 **Stephens T. G.**, Bhattacharya D., Ragan M. A., and Chan C. X. *Polarella* genomics: understanding the evolutionary transition to algal symbiosis and cold adaptation. *Botany Department, Biosciences Institute, University of Sao Paulo*. 14th December 2018, Sao Paulo, Brazil.

2018 **Stephens T. G.**, Bhattacharya D., Ragan M. A., and Chan C. X. *Polarella* genomics:

understanding the evolutionary transition to algal symbiosis and cold adaptation. *2nd Bioenergy Workshop, UNESP-USP-UNICAMP Integrated Postgraduate Program in Bioenergy, Institute for Research in Bioenergy, State University of Sao Paulo (UNESP)*. 6th December 2018, Sao Paulo, Brazil.

2017 **Stephens T. G.**, Bhattacharya D., Ragan M. A. and Chan C. X. Insights into coral reef symbiosis from the genome of cold-adapted algae. *EMBL Australia Postgraduate Symposium 2017*, 29th November-1st December 2017, Sydney, Australia.

Grants

2022 Core Facility Utilization Application, $5,000 USD Funds for sequencing of coral microbiome samples. Principal Investigators: Debashish Bhattacharya (Rutgers University), Rutgers University

2022 Center for Nutrition, Microbiome, and Health Small Grant FY-22, $2,000 USD Characterizing the coral microbiome biogeography across colonies and reefs. Principal Investigators: Debashish Bhattacharya (Rutgers University), Center for Nutrition, Rutgers University

2018 UQ-FAPESP Strategic Research Fund SPRINT (2018/15159-9), $20,000 (~USD $14,000) Integrated genomic approaches to understand stress tolerance in bioethanol-producing yeasts and

coral reef symbionts Principal Investigators: Cheong Xin Chan (UQ) and Jeferson Gross (State University of Sao Paulo), Jointly funded by University of Queensland (UQ) and Sao Paulo State Foundation (FAPESP)

Media coverage

2022 Our paper Retrotransposition facilitated the establishment of a primary plastid in the thecate amoeba *Paulinella* covered by Rutgers Research

2022 Article by Rutgers Research on our short film The Coral Holobiont Response to Climate Change which won Best Trailer in the Kiez Berlin Film Festival.

2021 Our paper Why is primary endosymbiosis so rare? was covered by Rutgers Newsroom. We also produced two animated videos: Video 1, Video 2

2020 Our paper Amoeba Genome Reveals Dominant Host Contribution to Plastid Endosymbiosis covered by

Rutgers
