

Timothy Stephens

Curriculum vitae

Personal summary

I am a computational biologist working on understanding the forces that govern the interactions between organisms in ecologically critical environments, such as coral reefs, and the forces that drive major evolutionary transitions, such as the one that gave rise to the first photosynthetic Eukaryotes.

📍 Department of Biochemistry and Microbiology, Rutgers University, USA

Education

2016 — 2019	PhD, Institute for Molecular Bioscience, The University of Queensland
2015 — 2015	Honours, Institute for Molecular Bioscience, The University of Queensland
2012 — 2015	Bachelor of Biotechnology, Institute for Molecular Bioscience, The University of Queensland

Research Experience

2019 — present	Post Doctoral Associate, Department of Biochemistry and Microbiology, Rutgers University
2016 — 2019	PhD, Institute for Molecular Bioscience, The University of Queensland
2015 — 2015	Honours Project, Institute for Molecular Bioscience, The University of Queensland
2014 — 2014	Undergraduate Researcher Project, School of Biological Sciences, The University of Queensland
2013 — 2013	Paid Research Assistant, School of Biological Sciences, The University of Queensland
2012 — 2013	Undergraduate Research Project, Institute for Molecular Bioscience, The University of Queensland

Teaching experience

2020 — 2022	Guest lecturer Rutgers University Conducted lectures on de novo next-generation sequencing, genome and transcriptome sequencing, and metagenomics in a join undergraduate and postgraduate course titled “Fundamentals of Microbial Genomics”. Also assisted in designing and marking student exam questions and students’ oral presentations.
2018	Head Practical Tutor University of Queensland Duties included designing and developing assessment material for the course and organising marking of assignments.

1

2016 — 2017	Practical Tutor University of Queensland Duties included assisting students with the completion of set questions and marking of assignments.
2013 — 2014	Peer Assisted Study Session (PASS) Tutor University of Queensland Duties included planning and leading multiple weekly tutorial sessions, each comprising 20-30+ students.
2013	Science Mentor University of Queensland Duties included organizing and running first year science student introduction and social engagement events designed to inform students about study / research opportunities available at The University of Queensland.
2012 — 2014	CASPiE Tutor University of Queensland Duties included guiding undergraduate chemistry students through an advanced set of research-focused practicals, with the aim of developing their critical and experimental thinking.

Professional development

2017	UQ Idea Hub, University of Queensland
2017	Research Commercialisation Workshop, University of Queensland

Awards and honours

2021	2019 Dean’s Award for Outstanding Higher Degree by Research Theses, University of Queensland
2018	Registration award for Society for Molecular Biology & Evolution (SMBE) 2018, SMBE
2017	Won best pitch prize at the UQ Idea Hub, University of Queensland
2016	Research Training Program (RTP) scholarship, University of Queensland
2016	Top poster prize at the IMB Research Higher Degree Student Symposium, University of Queensland
2012	Selected for the Advanced Study Program in Science (ASPinS; based on academic merit), University of Queensland
2012	Dean’s Commendation for Academic Excellence (achieved a GPA over 6.6), University of Queensland
2011	Merit Scholarship for academic achievement, University of Queensland

Grants

2022	Core Facility Utilization Application, \$5,000 USD Funds for sequencing of coral microbiome samples. Principal Investigators: Debashish Bhattacharya (Rutgers University), Rutgers University
2022	Center for Nutrition, Microbiome, and Health Small Grant FY-22, \$2,000 USD Characterizing the coral microbiome biogeography across colonies and reefs. Principal Investigators: Debashish Bhattacharya (Rutgers University), Center for Nutrition, Rutgers University
2018	UQ-FAPESP Strategic Research Fund SPRINT (2018/15159-9), \$20,000 (–USD \$14,000) Integrated genomic approaches to understand stress tolerance in bioethanol-producing yeasts and coral reef symbionts Principal Investigators: Cheong Xin Chan (UQ) and Jeferson Gross (State University of Sao Paulo), Jointly funded by University of Queensland (UQ) and Sao Paulo State Foundation (FAPESP)

Media coverage

2022	Our paper Retrotransposition facilitated the establishment of a primary plastid in the thecate amoeba Paulinella covered by Rutgers Research
2022	Article by Rutgers Research on our short film The Coral Holobiont Response to Climate Change which won Best Trailer in the Kiez Berlin Film Festival.
2021	Our paper Why is primary endosymbiosis so rare? was covered by Rutgers Newsroom . We also produced two animated videos: Video 1 , Video 2
2020	Our paper Amoeba Genome Reveals Dominant Host Contribution to Plastid Endosymbiosis covered by Rutgers Today
