

# Timothy Stephens

## Curriculum vitae

### Personal summary

---

I am a computational biologist working on understanding the forces that govern the interactions between organisms in ecologically critical environments, such as coral reefs, and the forces that drive major evolutionary transitions, such as the one that gave rise to the first photosynthetic Eukaryotas. I am also CEO of OceanOmics, a company dedicated to developing salable tools for environmental health monitoring.

📍 Department of Biochemistry and Microbiology, Rutgers University, USA

### Education and Research Experience

---

- |                |   |
|----------------|---|
| 2019 — present | Post Doctoral Associate, Department of Biochemistry and Microbiology, Rutgers University    |
| 2016 — 2019    | PhD, Institute for Molecular Bioscience, The University of Queensland                       |
| 2015 — 2015    | Honours, Institute for Molecular Bioscience, The University of Queensland                   |
| 2012 — 2015    | Bachelor of Biotechnology, Institute for Molecular Bioscience, The University of Queensland |

### Awards and honours

---

- |      |  |
|------|--|
| 2023 | Selected to attend and present at the New Phytologist Next Generation Scientists Conference 2023, National University of Singapore |
| 2021 | 2019 Dean's Award for Outstanding Higher Degree by Research Theses, University of Queensland                                       |
| 2016 | Research Training Program (RTP) scholarship, University of Queensland  |
| 2012 | Dean's Commendation for Academic Excellence (achieved a GPA over 6.6), University of Queensland                                    |
| 2011 | Merit Scholarship for academic achievement, University of Queensland   |

### Select Publications

## Grants

---

- 2024 New Jersey CSIT Clean Tech Seed Grant Program Round 3, \$74,870 USD  
Funds awarded to our startup OceanOmics to continue development of our coral health monitoring toolkit., New Jersey Commission on Science, Innovation and Technology
- 2023 Rutgers TechAdvance Fund, \$74,842 USD  
Funds to continue development of our coral health monitoring toolkit.  
Principal Investigators: Debashish Bhattacharya (Rutgers University), Rutgers University
- 2023 Climate Action Grant 2023, \$10,000 USD  
Funds for metabolomic and transcriptomic profiling of sex hormone dysregulation in spawning corals during thermal stress.  
Principal Investigators: Debashish Bhattacharya (Rutgers University), Rutgers University
- 2023 Core Facility Utilization Application 2023, \$5,000 USD  
Funds for metabolomic profiling of the sex hormone cycle in spawning corals.  
Principal Investigators: Debashish Bhattacharya (Rutgers University), Rutgers University
- 2022 Core Facility Utilization Application 2022, \$5,000 USD  
Funds for sequencing of coral microbiome samples.  
Principal Investigators: Debashish Bhattacharya (Rutgers University), Rutgers University
- 2022 Center for Nutrition, Microbiome, and Health Small Grant FY-22, \$2,000 USD  
Characterizing the coral microbiome biogeography across colonies and reefs.  
Principal Investigators: Debashish Bhattacharya (Rutgers University), Center for Nutrition, Rutgers University
- 2018 UQ-FAPESP Strategic Research Fund SPRINT (2018/15159-9), \$20,000 (~USD \$14,000)  
Integrated genomic approaches to understand stress tolerance in bioethanol-producing yeasts and coral reef symbionts  
Principal Investigators: Cheong Xin Chan (UQ) and Jeferson Gross (State University of Sao Paulo), Jointly funded by University of Queensland (UQ) and Sao Paulo State Foundation (FAPESP)

## Teaching experience

---

- 2020 —  
present Co-lecturer  
Rutgers University  
Design and conducted lectures on de novo next-generation genome and transcriptome sequencing, metabolomics, proteomics, metagenomics, phylogenetics, and phylogenomics in a join undergraduate and postgraduate course titled “Fundamentals of Microbial Genomics”. Duties include designing and marking student’ exam questions and oral presentations.
- 2018 Head Practical Tutor  
University of Queensland  
Duties included designing and developing assessment material for the course and organising marking of assignments.

## Selected Talks

---

- 2023 **Stephens T. G.**, Etten J. V., Benites L. F., Mcdermott T., and Bhattacharya D.  
Cyanidiophyceae: The extremophilic red algae that underpin hot spring microbial communities in Yellowstone National Park. *UQ Marine Ecogenomics Symposium 2023*. 13-14 December 2023, University of Queensland, Australia.

- 2023 **Stephens T. G.**, Calatrava V., Gabr A., Grossman A., and Bhattacharya D. Exploring the origin and evolution of primary plastids using *Paulinella* as a model system. *International Society of Endocytobiology conference 2023*. 10-14th September 2023, Field Museum, Chicago.
- 2023 **Stephens T. G.**, Chille E., Strand E. L., Putnam H. M., and Bhattacharya D. Multi-omics investigation of coral resilience. *Invited talk at Carnegie Plant Biology Seminar, August 2023*. 25th August 2023, Carnegie Department of Plant Biology, Stanford University, USA.
- 2023 **Stephens T. G.**, Calatrava V., Gabr A., Grossman A., and Bhattacharya D. Exploring the origin and evolution of primary plastids using *Paulinella* as a model system. *New Phytologist Next Generation Scientists Conference 2023*. 3rd July 2023, National University of Singapore, Singapore.
- 2023 **Stephens T. G.**, Calatrava V., Gabr A., Grossman A., and Bhattacharya D. Exploring endosymbiosis and biotic interactions using niche, non-model algae. *Invited talk at SCMB GenGen/ACE Special Seminar*. 10th January 2023, The University of Queensland, Brisbane, Australia.
- 2022 **Stephens T. G.**, Strand E. L., Putnam H. M., and Bhattacharya D. Differences in ploidy and the prevalence of clonal propagation between *Montipora capitata* and *Pocillopora acuta* from Kane'ohe Bay, Hawai'i. *15th International Coral Reef Symposium*. 3-8th July 2022, Bremen, Germany.
- 2022 **Stephens T. G.**, Etten J. V., McDermott T., and Bhattacharya D. Analysis of environmental meta-omics data from the extremophilic red algae Cyanidiophyceae. *Joint Aquatic Sciences Meeting*. 14-20th May, 2022, Grand Rapids, USA.
- 2021 **Stephens T. G.**, Calatrava V., Gabr A., Grossman A., and Bhattacharya D. Insights into the evolution of a primary endosymbiosis through analysis of the *Paulinella* genome. *75th Annual Meeting of the Phycological Society of America*. 13-22nd July 2021, online.
- 2021 **Stephens T. G.**, Calatrava V., Gabr A., Grossman A., and Bhattacharya D. Insights into the evolution of a primary endosymbiosis through analysis of the *Paulinella* genome. *12th International Phycological Congress*. 22-26th March 2021, Chile.

## Media coverage

---

- 2024 Our paper [Viruses associated with extremophilic red algal mats reveal signatures of early thermal adaptation](#) was featured by [Science](#)
- 2023 Our paper [A k-mer-Based Approach for Phylogenetic Classification of Taxa in Environmental Genomic Data](#) won the [Publisher's Award for Excellence in Systematic Research](#)
- 2022 Our paper [Retrotransposition facilitated the establishment of a primary plastid in the thecate amoeba Paulinella](#) covered by [Rutgers Research](#)
- 2022 Article by [Rutgers Research](#) on our short film [The Coral Holobiont Response to Climate Change](#) which won Best Trailer in the Kiez Berlin Film Festival.
- 2021 Our paper [Why is primary endosymbiosis so rare?](#) was covered by [Rutgers Newsroom](#). We also produced two animated videos: [Video 1](#), [Video 2](#)
- 2020 Our paper [Amoeba Genome Reveals Dominant Host Contribution to Plastid Endosymbiosis](#) covered by [Rutgers Today](#).

## Service

---

- 2023 — present Associate Editor: Symbiotic and Parasitic Protists section, [Frontiers in Protistology](#)

## Patents

---

- 2023 Provisional Patent "Protein Markers of Coral Stress" (5431.1025-000:2023-098)  
Non-provisional US Patent filed 2024/03/27
- 2023 Provisional Patent "Coral Rapid Strip Test" (5431.1024-000:2023-097)
